

tiga

Prescribe with Precision:  
Choose **Central e-Prescription**

Central e-Prescription facilitates the entire prescription process through electronic prescription generation within a national-scale digital environment. It's a time-saver and error-buster, benefiting everyone involved, from prescribers to patients, healthcare professionals and regulatory bodies. With this system, medicine dispensing is accurate, efficient and much smoother, making healthcare delivery a more quality experience.

Initially designed to control the prescribing of narcotics and psychotropics, Central e-Prescription proved so successful in preventing fake prescriptions and fraud to prevent abuses related to this specific medicine group; the system was expanded in subsequent phases to control other medications. Ultimately, its scope has expanded to cover all prescriptions across the country, becoming the digital system used for all prescribed medications. Now, let's look at what key features contributed to its remarkable success.

- Simplified SIG Code Prescribing
- Dispensing Accuracy
- Allergy and Drug-Drug Interaction Controls
- Measures Against Narcotics and Psychotherapeutics Abuse
- Pharmacovigilance Data
- Patient Drug History
- Medication Inventory Database
- Rapid Emergency Updates
- Automated Refill Authorization
- Decision Support System

Central e-Prescription shows excellent results!
